Jack, the son of Mariano, the big chief of the Navajos, proposes to enter a horse in one of the running races at the Albuquerque fair. The Navajos own a large number of horses and there will be several of the best of them to be the discoverers of this valuable picked out to compete with American metal on their claim—the now justly thoroughbred stock.

"Slap Jack" Bill, who was arrested and tried for robbing the stage near Las Vegas, was roundly thrashed at Bacon Springs on the A. & P. road a short time ago. If the Gov ernor will not take prompt action, le the people rise in their might and exercise their God given right of self-de-fense and send this tribe of Apaches to their happy hunting-grounds. WHITE OAKS AND VICINITY.

Much prospecting is being done. A bank is needed. A banker with \$25,000 would reap a rich harvest.

More capital was invested and more capitalists bought interests in the dis-trict during the month of July than ever before since the first strike was made.

The Golden Era reports the camp never so prosperous before, and judging by the industrial notes with which its last issue is filled, the Oaks is coming steadily to the front.

It is reported that a valuable turquois mine, that was evidently worked years ago, has been discovered in the Nogal district twenty-five miles southwest of White Oaks. It is owned by Joseph Joquel, Paul F. Wagner, Henry Pfing-sten and others and is located on the divide between Nogal Canyon and the Rio Bonito, about one mile east of Nogal Peak. The Councy Mining District Gains the \$20,000 Frize.

It is well known to miners, prospectors, and those interested in mining, that Prof. Edison has offered \$20,000 as a prize to the first party who discovered platina in paying quantities in this country. The metal is required for manufacturing burners for his system of electric light. It has been reserved for Messrs. Tiernan, May and Andreas, Bismarck Lode-in the Cooney district, Mogollon mountains. The metal is found in conjunction with free gold in about equal quantities, lying between walls of porphyry and granite, the lode being about thirteen feet wide.
